

ALESSANDRO CIOFINI

Summary

Beside I love literature, I have a rock solid technical education. All my studies concerned electronics and informatics and so I've been involved into information technology area in all my jobs.

I was a web developer in late '90, then a CTO & Head of Human Resources in early '00.

Worked on my own company on a cloud application and and lately being an IT consultant, software architect and technical leader until nowadays.

I always had a positive attitude for team-working and problem-solving, managing people and new technologies. Born in 1971.

Education

University of Florence – Electronics Engineering Dept. , Florence

Degree, Deferred

I started my faculty on late 1989.

I attended all my courses (28) in five years, passing 26 over 28 exams with an average of 28.1 over 30.

In the late '90 I deferred my last two exams and my final dissertation (published here

<http://ieeexplore.ieee.org/search/searchresult.jsp?searchWithin=%22Authors%22:.QT.Ciofini.%20A>. for the VTC-2001 Conference) and then I never resumed.

ITIS "Galileo Galilei", Arezzo

High School, Graduated June 1989

Unless my High School was basically a technical institute, I chose the one with more humanistic topics (with basics on law, philosophy, music, and so on).

I built my first game (a kind of Simon game, really from scratch: from electronics motherboard equipped with a Z80 processor until the case, four coloured led included) and discussed my first dissertation on Nietzsche, during my final exam.

Hobbies & Interests

I love playing piano and playing bridge.

I adore singing (I founded a vocal "a cappella" quartet in the '90, the Hesperimenta Vocal Ensemble, focusing into early Renaissance sacred and profane music).

Last and first, I love the art of novel and literature, so I used to read a lot (and write a bit).

Professional Skills

Devops CI/CD and AWS Cloud: Expert

PHP/C++/Java/HTML5/CSS3/Javascript: Expert

Software analysis / Project management: Expert

Relational DB (MySql, Postgres, Mongo): Expert

Unix/Linux S.O.: Expert

CMS/Framework (Magento, Wordpress, Drupal, Laravel, AEM CQ5): Expert

Networking and sysadmin: Expert

Languages

Italian: Native

English: Fluent

French: Conversational
